Management professional with proven expertise in technology consulting and software engineering. Experienced in data analysis, cloud, and client facing solution delivery. Skilled in bridging business strategy with technical execution through Agile methodologies.

Education

Great Lakes Institute of Management

MBA PGPM

Chennai, India

April 2026

SRM University, Andhra Pradesh

B.Tech in Computer Science and Engineering; Score: 83.60%

Andhra Pradesh, India

2022

Urbane Junior College

Class XII; Score: 92.60%

Hyderabad, India

2018

Narayana High School

Class X; Score: 95.00%

Hyderabad, India

2016

Experience

Fiserv

Aug 2022 – Nov 2024

Business analyst

Bengaluru, India

- Led cross-functional execution of enterprise cloud migration to AWS (EC2, RDS, S3, VPC), aligning engineering, infrastructure, and finance stakeholders to deliver 30% cost optimization and 25% improvement in platform availability.
- Established KPI-driven performance governance by defining and tracking transaction latency, API success rates, and regional traffic metrics through executive Power BI dashboards, enabling proactive risk identification and 35% faster incident resolution.
- Drove data-informed decision-making by leveraging AWS Athena (SQL) to analyze large-scale payment logs, identifying system bottlenecks and prioritizing enhancements that improved backend efficiency by 15%.
- Partnered with project managers and functional teams to manage dependencies, document key decisions, and support structured reporting (status updates, risks, and action trackers), ensuring on-time delivery of business-critical initiatives.

CUREYA

Dec 2021 – Jan 2022

Technical HR Intern

Remote

- Streamlined hiring processes by implementing structured evaluation criteria, enhancing the quality of candidate selection.

ECIL

May 2019 – Jun 2019

Android Developer Intern

Hyderabad, India

- Designed and implemented a student information system using Java and SQL, reducing manual data errors by 50%.

Projects & Research

Assistive Technologies for the Visually Impaired | Springer

Feb 2022

- Authored and published a research paper analyzing current and emerging assistive technologies for blind individuals, featuring both research and market-ready solutions.

Drowsiness Detection Using AI | Journal of Computing

Aug 2021

- Published a research paper on an eye-state monitoring system using Viola-Jones and SVM algorithms to detect driver drowsiness via head and eye movement.

Food Ordering Web Application | Django, Python

2020

- Developed a food ordering web application; converted a college-level APSSDC hackathon win into a 2-month internship at SRM University.

Technical Skills

Languages: C++, Java, Python, SQL, HTML/CSS

Cloud & DevOps: AWS (EC2, RDS, S3, VPC, Athena), Google Cloud, Azure

Tools: Power BI, Tosca, Django, Git, Agile Methodologies

Core Concepts: Generative AI, Digital Transformation, Project Management, Data Analysis
